[2005] Meddelelse fra Kommissionen nr. 36

Fortroligt

**PLA Air Force Command (meddelelse)** 

Udstedelse til luftvåben 550 og de i alt 6 underjordiske kommandoposter Projekt for kommunikations- og kommandostyringssystem - Byggeplan

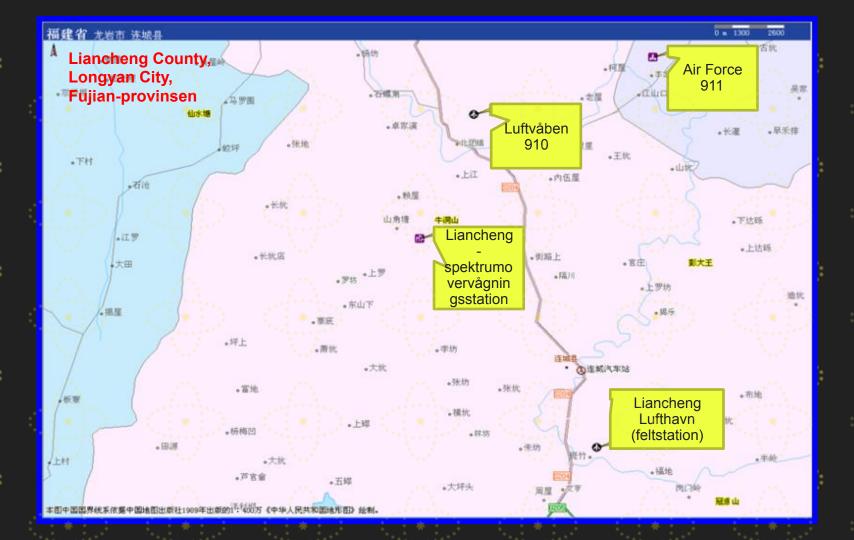

Luftvåben i Nanjing og Guangzhou militærregion, kommando for 15. luftbårne hær:

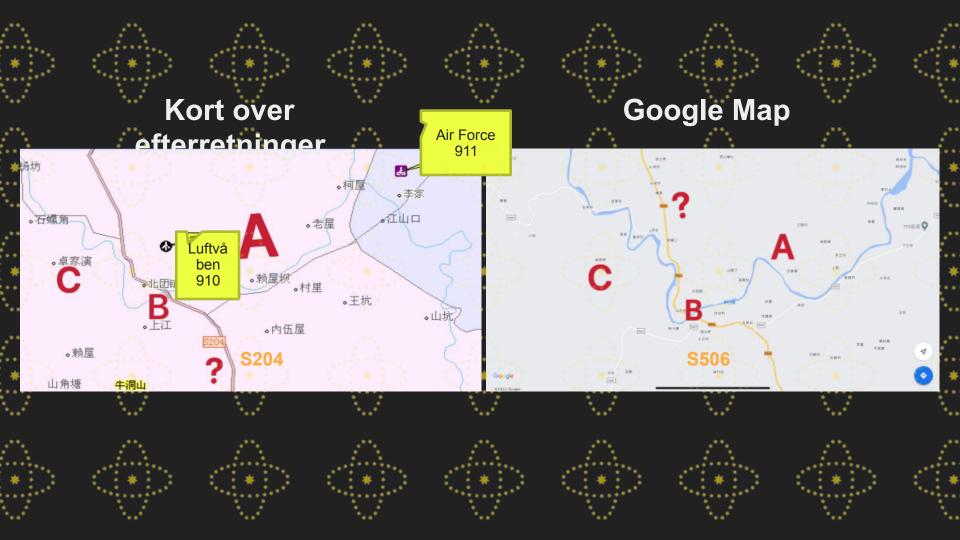

I overensstemmelse med Generalstabens afdelingens [2004] Generalstabens kommando nr. 673 "Svar på rapporten om opgaven vedrørende konstruktionsprojektet for kommunikations- og kommandokontrolsystem til kommandoposter" udstedes hermed en plan for konstruktion af luftvåbnets kommunikations- og kommandoposter.

# Underjordisk kommandosystem

- 910 & 550-serien, med grotte og tunneludgang, dybde, udvidelsesretning
- osv., herunder cement og stålstangkvalitet, ventilationskanaler,
- ligesom en grav, der begraver folk levende

#### Design Plan

#### 2.1Project Overview

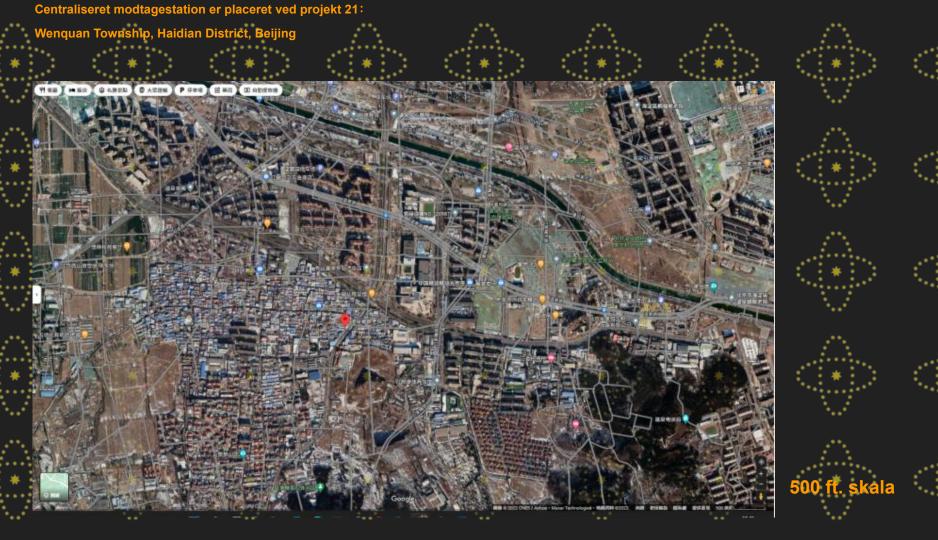

The 550 short-wave communication system consists of a <u>centralized receiving station</u> and a <u>centralized sending</u> station. The centralized receiving station is located in project No. 21, and the centralized sending station is located in project No. 1.

Project No. 21 is located in Wenquan Township, Haidian District, Beijing. There are 6 signal receiving rooms in the project, with a total area of 124.1 square meters. 120 receivers and terminals can be installed inside. For details, see "General Plan of Project No. 21".

Project No. 1 is located in Juli Village, Jiuduhe Town, Huairou District, Beijing. The project has 5 signal sending rooms with

 Den centrale modtagestation er placeret på Project 21:
 Wenquan Township, Haidian District, Beijing

 Den centrale sendestation er placeret i Projekt 1: Juli Village, Jiuduhe Town, Huairou District, Beijing

# Projekt 910

Selv om udstyret i dokumentet blev bygget i 2007 og kan være blevet opdateret, er det vigtigste adressen og kabelføringen, som har været brugt længe og ikke kan ændres!

Udstyret er som køretøjet, og ruteføringen er vejen. Køretøjerne kan opdateres, men når vejen først er bygget, kan den ikke ændres, alle køretøjer skal køre på vejen.

Så længe man har vejen som mål at ødelægge, vil der ikke være noget køretøj tilbage på vejen.

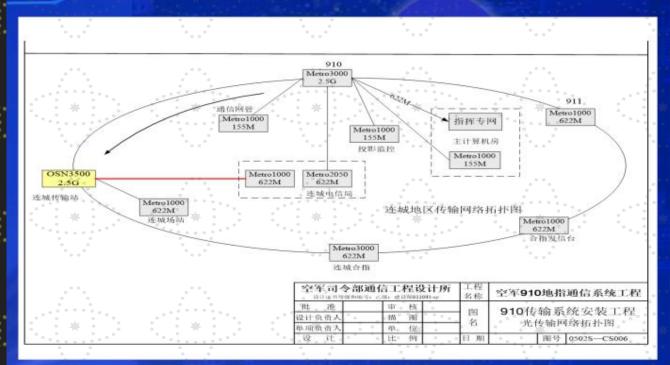

Når man kender den nøjagtige adresse, breddegrad, længdegrad og ruteføring, behøver man ikke at bekymre sig om hvilket udstyr det er nu, man skal bare ødelægge det.
